

Mohammed Quasem MAS 2013

Joined USC Department of Statistics Faculty in 2016 as a full time Instructor

I have been teaching undergraduate Mathematics from Pre-Algebra to Calculus sequence and meanwhile fostering my love for statistics by being a MAS (Master of Applied Statistics) graduate student. The MAS program allowed me to interact with excellent faculty at USC while doing what I like the best teaching. The convenience of watching lectures online and turning in assignments online cannot be beat. The always helpful and outstanding teachers have always been there if I needed any questions answered or to clarify any concepts. When I received the appointment as faculty in the same department it was a dream come true to work alongside such wonderful faculty and the best of teachers I have ever encountered.

I would recommend the CAS and MAS program to anyone who wants to expand their learning of practical applications of Statistics taught by the finest professional and humanistic practitioner of USC statistics department.
